Lumitec is an engineering and design firm solely focused on the conceptualization, development, and manufacture of high-quality extreme environment LED lighting. Our LED fixtures are designed with an in-depth understanding of each light's application and use environment. We leverage this knowledge among our team of highly skilled engineers and designers working in our state-of-the-art LED R&D facility to deliver leading-edge innovation, best-in-class performance, exceptional reliability, and unsurpassed quality.

Digital Lighting Control

Lumitec's Poco Digital Lighting Control is a powerful, cost-effective on-board lighting control solution. It provides fingertip touch control of Lumitec PLI-enabled lights through a compatible MFD or connected smart device via a simple, easy-to-install control module.

Expandable through the incorporation of Pico Modules, the Poco system offers the same level of sophisticated lighting control previously found only on high-end yachts.

Poco Module
3.5" W X 5.5" H X 1.25" D

Pico Modules (S8 & C4)
2" W X 2.75" H X 0.5" D

Pico C4-MAX
#" W X #" H X#" D

Pico Module (OHM)
1.5" W X 1.35" H X 0.3" D

Sold in packs of 4

Pico S8   Pico C4   Pico C4 Max   Pico OHM

Poco™ Digital Control Module

Poco Digital Lighting Control delivers powerful, low-cost, on-board lighting control through a compatible MFD or connected smart device in a simple, easy to install control module.

Suitable for new builds or refits, the Poco 3 Digital Control Module is compact and completely sealed. Because it replaces physical circuits, wires, and switches, builders will often find that they can save money while offering their customers the sophisticated control previously found only on high-end yachts. When installed with Lumitec's PLI-enabled lights, even more functionality is unleashed – precise color selection and intensity, custom lighting scene creation and multiple 'virtual circuits' on a single channel, allowing aftermarket installers to add lights and improve on-board lighting designs without adding any additional wire runs.

Poco Digital Lighting Control Module

SKU	Description	Channels	Voltage	Amps
101699	Poco 3 Digital Lighting Control Module	4	10-30vDC	10A/ch

The Poco 3 Digital Control Module can be controlled through a compatible MFD or connected smart device (not included).

PLI — Power Line Instruction   IP67 — IP Rated   3 — 3 Year Warranty   *Applies to Poco and all Pico Modules*

Pico™ Expansion Modules

Pico Expansion Modules are designed to expand the capabilities of the already powerful Poco Digital Lighting Control system. There are currently four modules available.

Pico C4 - provides TTP functionality or Poco control of third-party RGB or RGBW lighting accessories such as lighted speakers and LED boat lettering. Max load of 2.5A.

Pico C4-MAX - Similar function to the standard C4 but with higher output and incorporates a low current signal wire control to reduce the load on the Poco channels. 10A max load.

Pico S8 - provides the ability to assign Poco virtual switch commands to mechanical switches (8 max). Physical switch will activate the virtual switch command through the Poco module.

Pico OHM - provides efficient Poco-only control of third-party RGB lighting accessories (no TTP). Connects in-line at RGB accessory, 250mA max load. Sold in packs of four (4) modules.

SKU	Description	Voltage	Max Amps
101609	Pico C4 Module	10-30vDC	2.5A
101873	Pico C4-MAX Module	10-30vDC	10A
101684	Pico S8 Module	10-30vDC	100mA
101829	Pico OHM Module (4 pack)	10-16vDC	400mA

CapriLT/CapreraLT

With more than 1,000 integrating sphere tested lumens[†], the versatile and lightweight CapriLT and CapreraLT are the undisputed value-leaders in the spreader lights category. The LT delivers exceptional reliability, class-leading performance, and has been rigorously tested for shock, vibration, water ingress, and overall durability - in short, exceptional value in extreme environment LED flood lighting. Compatible with most PWM[**] LED dimmers. IP67 compliant.

Capri3/Caprera3

The Capri3/Caprera3 builds on the huge success of the Capri/Caprera line of spreader lights. Now with 1,200 lumens, a smaller, more thermally efficient powder-coated die-cast aluminum housing with improved optical beam pattern and no exposed fasteners on flush mount lights. But the innovation doesn't stop there; Capri3 has our innovative easy fit butterfly clip mounting system to greatly simplify the installation process. Capri3/Caprera3 is IP67 compliant and PLI enabled (Poco compatible) on many models.

Corsica Inset Flood Light

CONTOUR SERIES

Sleek, clean, and powerful, the Corsica Inset Flood Light is a new addition to the mold-in Contour series. Corsica's design allows it to be sculpted into hardtops, wheelhouses, or arches for a cohesive and integrated look. Corsica delivers more than 1,200 darkness-piercing lumens and is our first light to feature the all-new Spectrum Halo™ accent light. Spectrum Halo™ casts an even, dimmable, colored glow while enhancing a vessel's nighttime aesthetics. TTP and PLI enabled, Corsica can be controlled with any normal on/off switch and is also compatible with our Poco Digital Lighting Control system.

Maxillume h60

From the world's top custom yacht builders to the US Coast Guard, customers with high expectations rely on the Maxillume h60 flood light. Packing more than 6,000 TRUE lumens[†] (dimmable), the h60 is available with two mounting options and our tried and tested internal dimmer control. Each light is completely water sealed (IP67 compliant) and rigorously tested for shock and vibration. The h60 is PLI enabled (Poco compatible) and has a 3-wire configuration (additional orange signal wire).

Maxillume h120

The Maxillume h120 has set the standard in DC-powered deck/work lights. Delivering more than 12,000 TRUE lumens[†] (dimmable) and housed in a heavy-duty powder-coated die-cast aluminum housing. The polished 316 Stainless Steel bracket on the trunnion mount version offers maximum flexibility for positioning and will ensure the light stays put through rigorous vibration and shock. The h120 is PLI enabled (Poco compatible) and has a 3-wire configuration (additional orange signal wire).

Razor™ Light Bar

Sleek, streamline, and powerful, Razor is specifically designed for marine applications. PLI enabled (Poco compatible) with a 3-wire configuration the Razor Light Bar is designed to be easily integrated into most existing hardtop, arch, and pilothouse designs, or it can surface-mount directly to unmodified hardtop surfaces for an equally clean look. But don't let the small footprint fool you, Razor packs a punch with over 10,000 night-piercing lumens of dimmable light. Available in two beam patterns, spot, or flood with a choice of a white or black finish.

Zephyr Spreader/Deck Light

The Zephyr spreader light is equally well suited to lighting the fore-deck of an elegant sloop or the cockpit of a sport yacht. Mounted on spreaders, spars, radar arches or towers, and fly-bridges at a mounting height of 16 feet, this spreader light brightly illuminates an area nearly 24 feet in diameter with more than 1,000 lumens[†]. Positionable, sleek and versatile with unsurpassed reliability - meaning no more costly and complex bulb replacements.

Perimeter Light

The Perimeter Light is versatile, attractive, and powerful. With more than 1,000 true lumens[†] and an optical system designed to spread light very widely and evenly, it is uniquely suited to various specialty applications. Use it overhead in cramped service spaces for offset illumination of critical mechanical components. Or mount it on vertical exteriors of pilot houses, cabins, or even terrestrial vehicles or trailers for bright, even perimeter illumination. Aluminum housing and impact-resistant plastic window means years of trouble-free service even in the most extreme environments.

Interior Down Lights

Delivering incredible output with profiles that are among the slimmest in the industry, Lumitec's Down Lights remain the best-performing products in the category. IP67 rated and completely sealed making them perfectly suited for a variety of indoor or outdoor overhead lighting needs. Enhance textures and surfaces with output options that include architectural-grade High CRI warm white and full-color RGBW Spectrum, offering nearly infinite output color possibilities.

Illusion™ Down Light

Introducing the Illusion Down Light . Sleek and stylish with an ultra-thin bezel-free design the Illusion Down Light provides for a seamless flush mount integration on hardtops, arches, and salon ceilings. Boasting chemically hardened wafer-thin glass with a shorter mounting depth than the Mirage, Illusion retains the convenient butterfly clip mounting system for no exposed fasteners. Advanced manufacturing techniques allow for the light face to adapt multiple finish options including the "illusion" of a bezel, on the one piece, flush mounted, easy to clean face. The Illusion Series Down Light will include a new "Light to Sound" synchronization feature when paired to a compatible Poco module. Color output options will include warm white/spectrum, cool white/spectrum, and single color warm and cool white output. IP67 compliant.

MIRAGE

POSITIONABLE MIRAGE

Mirage/Positionable Mirage/Square Mirage
Flush Mount Down Lights

The Mirage Down Light series remain the best-performing down lights in the category. Delivering incredible output and a profile that is among the slimmest in the industry. Completely sealed and IP67 rated, it is perfectly suited for a variety of indoor or outdoor overhead lighting needs. Output options include architectural-grade High CRI warm white, white/blue/red multi-color, and RGBW Spectrum, offering nearly infinite output color possibilities.
The Mirage series now include positionable (gimbal) and square models. The Positionable Mirage offers up to 30 degrees of pivot for wall wash, art lighting, and other dramatic lighting effects. The Square Mirage blends harmoniously with today's more contemporary and forward-thinking designs. All boast Mirage's industry-leading output, features, and contemporary good looks.

SPECTRUM™ COLOR

Halo

Class-leading output, weatherproof construction, and one of the simplest installations in the industry. With a shallow-depth profile (less than 1/2" mounting depth) and a secure composite mounting system, the lights are ideal for a variety of indoor and outdoor uses. Intelligent circuitry enables advanced features like dimming and multi-color control without external control modules, specialized switches, or additional wire runs. Completely sealed and IP67 compliant.

Orbit

Orbit Down Lights stand apart from the crowd with a shallow-depth profile (less than 1/2" mounting depth) and a secure composite mounting system. The lights are ideal for a variety of indoor and outdoor uses (IP67 compliant).

The Orbit Retrofit Kit covers oversized holes (1.875" to 2.750") from old style halogen lights. The ingenious clamp-in design has no exposed fasteners for a clean look inside and out.
Halo/Orbit Features:

| TTP Timed Toggle Protocol | 3PD Third Party Dimmer | CM Color Match Commitment | PLI Power Line Instruction | IP67 IP Rated | CE European Conformity | 3 Year Warranty | 2-Wire Hookup | Color Change | Dimming | RGBW Full-Color |

Touch Dome

Brilliant, innovative with a completely sealed design and no O-rings, baffles, or switches to wear out. Touch Dome promises reliable "touch" operation even when wet or wearing gloves. The proprietary Optical Field Sense technology provides on/off, color change, and even dimming. Ideal for switch free locations like galleys and heads. Touch Dome is beautifully designed and elegantly functional.

Aurora Flush Mount Dome Light

The Aurora Dome Light has been a long-standing favorite of OEMs, installers, and end-users. Loved for its faultless reliability, versatility, and performance. The Aurora Flush Mount Dome Light is one of the new additions to Lumitec's popular Contour line and offers a sleek, fully integrated design. Like its surface-mount sibling, output color and light intensity can be easily adjusted with a simple rotation of the bezel.

Aurora Surface Mount Dome Light

The high-quality Aurora Surface Mount Dome Light stands apart from other LED replacements for ubiquitous dome lights. Bright, with wide even light, a clean look, and an reliable, intuitive switch. Aurora offers multiple dual-color output options with dimming, IP67 immersion protection and a notable level of superior quality. It's no surprise that Aurora is a top seller with our OEM customers.

Moray Flex Light - With Integrated Lighting Controller

The Moray Flex Light is the only RGBW marine flex light to have an internal color output controller. This means that Moray can be connected directly to a 2-wire DC electrical system, allowing for color and dimming control with any standard on/off switch, with no external driver required. PLI enabled, Moray is also compatible with our Poco Digital Lighting Control system for advanced color control through an on-board MFD or smart device via a connected Poco module. Available in eight convenient sizes, Moray is the versatile and reliable flex light solution that will reduce wiring cost, time, and complexity.

Underwater Lighting

Known the world over for their performance and reliability, Lumitec's underwater lighting is the benchmark in the industry. With a wide range of products, a reputation for innovation, and a commitment to quality, Lumitec underwater products will continue to set the standard for many years to come.

All-New
SeaBlazeX3™

2024 will see the introduction of the all-new SeaBlazeX3. 7,000+ lumens of output with a lower profile - up to 50% less than the current X2, and a fresh newly designed emitter array. New features will include, for the first time a "Light to Sound" capability when paired with a compatible Poco module. SeaBlazeX3 will retain the same bronze construction and hole pattern as the X2, making upgrades easy and pricing is expected to be comparable to the current model. Production launch date for the new SeaBlazeX3 is estimated to be mid-2024.

SeaBlazeX2™

SeaBlazeX2 continues the legacy of the phenomenally successful SeaBlazeX series. The dual-color SeaBlazeX2 offers an internally synchronized white/blue crossfade mode as well as white or blue color output. The Spectrum offers a nearly limitless palette of intense, vivid colors complemented with a relaxing color cycle mode. Both versions deliver more than 6,000 lumens, easy surface mount installation, require no external drivers, Poco digital lighting control system compatibility, and a pedigree of reliability recognized the world over. SeaBlazeX2 is available with a bronze or polished finish option.

SeaBlaze™ Typhoon
Through-Hull Underwater Light

The evolution of the SeaBlaze underwater light series continues with the Typhoon Through-Hull Underwater Light. Typhoon sets a new standard for performance, reliability, and value in through-hull underwater lighting. Delivering more than 10,000 measured lumens (white) and a modular quick-change design for easy in-water service and upgrades. An innovative internal relay simplifies wiring and significantly reduces installation costs and complexity. Solid bronze housing requires a 3" mounting hole (3.625" flush mount). Full-color control using any standard on/off switch or use Lumitec's Poco Digital Lighting Control (sold separately) for even more advanced features.

Javelin600X

Style and performance unite to create the Javelin 600X underwater light. Designed for high-performance boats, the Javelin 600X is constructed from a solid naval bronze housing with a proprietary plating process for a brilliant high luster finish. Leveraging the same "smart light" technology found in our market-leading SeaBlazeX2 series - Javelin offers the same high performance, full-color RGBW output, simple surface mount installation, and the ease of operation only found in Lumitec products. Javelin is PLI enabled and fully compatible with our Poco Digital Lighting Control System.

SPECTRUM™ COLOR

Zambezi X2™
Surface Mount Underwater Light

The most powerful option of the Zambezi™ Series the Zambezi X2 outputs over 6,000 lumens and is compatible with our award-winning Poco Digital Lighting Control system, providing advance color control via a compatible MFD or connected smart device (Poco module is required). Choose from two color output options, brilliant dual-color white/blue or dazzling full-color Spectrum output. Perfect for mounting on typical transducer/accessory brackets.

Zambezi™ Quattro
Surface Mount Underwater Light

The most powerful option of the Zambezi™ Series the Zambezi X2 outputs over 6,000 lumens and is compatible with our award-winning Poco Digital Lighting Control system, providing advance color control via a compatible MFD or connected smart device (Poco module is required). Choose from two color output options, brilliant dual-color white/blue or dazzling full-color Spectrum output. Perfect for mounting on typical transducer/accessory brackets.

Zambezi™ Mini
Surface Mount Underwater Light

Perfect for smaller pontoons and skiffs, Zambezi Mini is small, easy to mount, easy on the wallet, yet packs a visual punch. Choose single-color or full-color Spectrum. Color selection is simple and can be controlled from a standard power switch, or pair with a Poco module (sold separately) for advanced color control through an on board MFD of connected smart device via the Poco app.

Lutra
Livewell/Utility Light

Bright, durable, and completely water sealed, the Lutra is built for the harsh environment of livewells and fish boxes. With more than four times the lumen output of other livewell lights, Lutra is ideal for today's larger livewells, fish boxes, and splash wells. Full-color spectrum output, PLI and TTP enabled, Lutra is compatible with the Poco Digital Lighting Control system for seamless color integration into any on board lighting scheme. IP68 compliant.

CONTOUR™ SERIES

Masthead 360 All-Round Anchor Combo Light

Stylish and sophisticated the Contour Masthead 360 All-Round Anchor Combo Light takes masthead combo lights to a whole new level. An innovative approach to the design dramatically reduces the lights profile and weight, making this Contour Masthead/Anchor Combo Light the slimmest and lightest on the market. Meeting USCG and NMMA C5 2021 standards, rated to 3 nautical miles the Contour Masthead/Anchor Combo Light is available in a 12" and 39" (1m) length with three mounting options – a motorized base, manual folding base, and antenna mount. Available with a white or black finish. IP67 compliant.

12" lengths are available on the manual folding option only.

Anchor Light

The Contour Anchor Light has the slimmest profile of any anchor light in the industry with a lightweight design and a locking retractable base. The convenient folding base boasts a small footprint, making for easy storage of the light during transportation. Set the light up in a snap with this innovative simple design and lock the light into position for worry-free use. Available in 12" and 39" (1M) lengths with a white or black shaft. U.S. Coast Guard approved 2nm.

Drop-in Navigation Light (Port/Starboard/Stern)

Contour's drop-in series leverages a single, symmetrical universal pocket design that is molded into the hardtop during the manufacturing process, for a low profile with no exposed fasteners. A clean, modern monochromatic finish adds to the seamless integration with careful consideration given to mating the draft angles and part radii. U.S. Coast Guard approved to 2nm.

IP67 IP Rated   **2NM** ABYC A16 Standard

2-Wire Hookup   **3** 3 Year Warranty

CONTOUR SERIES

Inset Navigation Light (Port/Starboard/Stern)

Designed specifically for custom builders, Contour's inset series is designed to be inset into the face of a hardtop or pilothouse with no exposed fasteners. Its small appearance make it almost disappear, but the output is more than large enough to exceed U.S. Coast Guard's 2nm requirements. U.S. Coast Guard approved 2nm for vessels up to 50m/165 feet.

IP67 IP Rated   **2NM** ABYC A16 Standard

Nautilus is available in a hand-polished 316 stainless steel or hand-polished bronze finish. Choose from warm white or RGBW full-color output. The Nautilus light is PLI and TTP enabled, meaning it can be added to a Mantis dock light kit or designed into a Kraken dock light system. Completely water sealed and IP67 compliant.

RGBW Full-Color   **Power Line Instruction**   **Timed Toggle Protocol**

IP67 IP Rated   **Color Cycle**   **CM Color Match Commitment**

CE European Conformity   **2-Wire Hookup**   **3 Year Warranty**

SKU	HOUSING	COLOR OUTPUT	CRI*	CCT*	VOLTAGE	12VDC	24VDC	LUMENS†
101631	Stainless Steel	Spectrum (cool wht)	80+	5000	10-30vDC	430mA	230mA	340
101632	Bronze	Spectrum (cool wht)	80+	5000	10-30vDC	430mA	230mA	340
101670	Stainless Steel	Spectrum (warm wht)	80+	3000	10-30vDC	430mA	230mA	255
101671	Bronze	Spectrum (warm wht)	80+	3000	10-30vDC	430mA	230mA	255
101633	Stainless Steel	White (warm wht)	80+	3000	10-30vDC	480mA	260mA	255
101634	Bronze	White (warm wht)	80+	3000	10-30vDC	480mA	260mA	255

* Lumens, CRI & CCT applies only to white light. W=Width, H=Height, D=Depth, Dia=Diameter
† Integrating sphere measured lumens within 1 minute of initial startup

Above Water Dock Lighting

No Dock lighting project is complete without the addition of above water lights. Lumitec offers the durability found in our marine lights with seamless integration, whether you go with a Kraken Modular System of the Plug 'N' Play Mantis Kit.

Ignition Protected

Dry Operation - light can operate out of water without damage

Color Change mode

Lumitec Limited Warranty

Our products are warrantied to be free from defects in workmanship and materials for a period of three (3) years from the date of original purchase. Should your Lumitec product prove defective during the warranty period, promptly notify Lumitec and return product with freight prepaid. Lumitec will, at its option, repair or replace the product without charge for parts or labor or refund purchase price. Products repaired or replaced under this warranty shall be warrantied for the unexpired portion of the warranty applying to the original product(s). Lumitec is not responsible for product failure caused by abuse, neglect, improper installation, or failure in applications other than those for which it was designed, intended, and marketed. No warranty or affirmation of fact, express or implied, other than as set forth in the limited warranty statement above is made or authorized by Lumitec. Any liability for consequential and incidental damages is expressly disclaimed. Lumitec liability in all events is limited to, and shall not exceed, the purchase price paid.
